

River Studies

Written by Administrator

Friday, 04 March 2011 16:58 - Last Updated Thursday, 24 March 2011 16:00

Using Total Stations and G.P.S. we can now supply complete river studies to help Environment Agency contractors in the production of data for flood defence management and channel maintenance in the form of reports and plotted CAD data.

Our software allows exports in various formats for use by the Environment Agency and Hydrographic Modelers.
